Product Discontinuation Notice

December 15, 2009

Dear Valued Customer / Partner:

Effective immediately, Transition Networks will be discontinuing the CETTF1018-105. This is a 10Mbps copper to fiber media converter module which supports the MT-RJ fiber interface. This discontinuation is due to the obsolescence of a key component used in this product.

Discontinued Product:

Model: CETTF1018-105	Description: 10Base-T RJ-45 to 10Base-FL 850nm MM MT-RJ 2KM converter module
--------------------------------	--

Replacement Product:

Transition Networks will not be offering direct replacement product, however there other products offered by Transition Networks within the CETTF product family that provide either the SC or ST fiber interface.

Last Order Date

A last-time-buy opportunity will not be available on this discontinued product.

Closing

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact your sales representative.

Sincerely,

Transition Networks Management Team
