

Product End of Life Notice

October 27, 2006

Dear Valued Customer / Partner:

The purpose of this letter is to serve as written notice of Transition Networks' intent to discontinue the CETCT1020-100 media converter. This is a 10Base-T to 10Base-2 media converter that is designed to be mounted in a Point System chassis. The CETCT1020-100 is being discontinued due to the end-of-life status of several key components used in this product.

Transition Networks will officially discontinue the following model:

Model	Description
CETCT1020-100	10Base-T RJ-45 to 10Base-2 BNC Point System Converter Module
CETCT1020-101	10Base-T RJ-45 to 10Base-2 BNC Custom Point System Converter Module

Final Order Date:

November 30, 2006 - Transition Networks will continue accepting orders through November 30, 2006.

Final Shipment Date:

February 28, 2007 - Due to long component lead times, the final ship date will be February 28, 2007.

Replacement product:

Transition Networks does not plan to offer a direct replacement product for use in a Point System chassis. The J/E-CX-TBT-02 would be a functional replacement; however this 10Base-T to 10Base-2 media converter is only available in a stand-alone form factor.

Closing

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact our sales representative.

Sincerely,

Transition Networks Management Team
