

Product End-of-Life Notice

December 5, 2006

Dear Valued Customer / Partner:

Effective immediately, Transition Networks has discontinued the CPSMC0100-205 single slot Point System chassis. The current CPSMC0100-200 should be used as the replacement product.

The power supply bundles used with the CPSMC0100-200 have been upgraded. The North American power supply now provides 12VDC, .800A from a 120VAC power source. All other country code bundles provide 12VDC, 1.25A from a 100-240VAC power source. These new power supplies are able to power any Transition Networks media converter that can be used in the single slot chassis. This upgrade has eliminated the need for the CPSMC0100-205.

Discontinued Product:

Model	Description
CPSMC0100-205	1-Slot Point System Chassis with external power supply for use with the CGETF, CPSVT, and CSDTF converter module families.

Replacement Product:

Model	Description
CPSMC0100-200	1-Slot Point System Chassis with external power supply for use with any single slot media converter module (excluding the CGFEB & CMEFG)

Last Order Date:

Open orders for the CPSMC0100-205 will be fulfilled, however no new orders will be accepted.

Availability:

Transition Networks is now accepting orders for the upgraded CPSMC0100-200

Closing:

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact your sales representative.

Sincerely,

Transition Networks Management Team
