## Product Discontinuation Notice

January 16, 2006

Dear Valued Customer / Partner:

As part of normal business procedures, manufacturers occasionally encounter component end-of-life issues and must redesign the affected products or allow them to go end-of-life. This is the case with the Transition Networks E-TBT-MC02 transceiver. Let this letter serve as written notice for the discontinuation of this 10Base Ethernet Twisted Pair Transceiver.

Transition Networks has officially discontinued the following model:

Model	Description
E-TBT-MC02	10Base-5 AUI DB-15 male to 10Base-T RJ-45 Transceiver

Final Orders:

Transition Networks' inventory of the E-TBT-MC02 is completely depleted and we are unable to accept any new orders for this product.

Replacement Product Cross –Reference Matrix:

Transition Networks does not plan on designing a replacement product. However Transition's Milan brand of media converters and transceivers does have a direct replacement. The Milan product is the MIL-10P. This product will be available, but only for a limited time, since it is also affected by the same component end-of-life issue which affected the E-TBT-MC02. The Milan MIL-10P is in stock and available. While supplies last, the MIL-10P will be the replacement for the E-TBT-MC02.

Discontinued Model	Replacement Model	Replacement Description
E-TBT-MC02	MIL-10P	10Base-5 AUI DB-15 male to 10Base-T RJ-45 Transceiver

Closing:

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Please note that if you currently have open orders with the discontinued product, these orders must be converted to the recommended replacement products listed above. Should you have any questions, please contact your sales representative.

Sincerely,

Transition Networks Management Team
