

Focal Point 2.2 Release Notes

Date: 12/5/2011

Version: 2512

Overview

This release note covers the updates to Focal Point 2.2 since the last released Version 2350 and any known issues in the previous versions of Focal Point 2.2.

Requirements

Focal Point 2.2 requires Java Runtime Environment version 1.5.0. or later.

Supported Platforms

Focal Point 2.2 is supported on

Windows 2000, XP, Windows 7, Windows Vista and Windows Server 2008

Release Changes and Enhancements

- Support for the Point System C4TEF120 cards has been added.
- Support for running Focal Point with JRE 1.6.0 has been added.
- For Point System cards in an ION chassis, powering on/off the Point System cards remotely is not supported. The powers on/off buttons in Focal Point GUI have been grayed out ONLY for Point System cards in an ION chassis.

Known Limitations and Restrictions

- FP 2.2 can only run one instant at a time. If you want to restart FP 2.2 stop the first FP 2.2 instance. Otherwise the second FP 2.2 instance cannot start up.
- In Windows 7 or Microsoft Vista, User Account Control Setting has to be disabled to launch Focal Point 2.2. Alternatively, you can right click on the Focal Point executable and choose "Run as administrator".
- If you are using Microsoft Vista or Windows 7, Telnet does not come pre-installed. To install Telnet: Click Start, Control Panel, Programs, and then Turn Windows Features on or off. In the list, scroll down and select Telnet Client. Click OK to start the installation
